I'm Ruby developer with 3 years of experience, strong skills in design, UI and administration of Unix systems and skills in Erlang, C and Go programming languages, experienced in producing accessible, easy to use web sites and applications.

Also I maintain some number of Open-source projects.

Skills

Programming Languages: Ruby, C, Go, Erlang, Javascript, CoffeeScript

Frameworks: Rails, Sinatra, Camping, Capistrano

Testing: RSpec, Test:Unit

Version Control: Git, SVN, Mercurial

Databases: MongoDB, Redis, MySQL, PostgreSQL, Sqlite3

Search engines: Xapian, Sphinx, Lucene, Solr

OS: Windows, Linux, Mac OS X

Other: Application Deployment, Unix systems administration, Bash, Unix System Programming, Web and Graphic Design, HTML, CSS

Experience

Ruby developer; Moscow, Russia, itBoat.com — 08/2011 — Present

Currently I'm working in biggest Boat-related company in Russia. I'm supporting legacy code, designing and developing new functionality and doing some graphic design. Also I created and maintain some in-house tools, just like: controller for Xen hypervisor, tools for working with suppliers and customers, lots of system utilities.

Tools and technologies used in work: Ruby, Rails 3, MySQL (Percona Server), Memcached, MongoDB, C for building system utilities, Javascript, HTML and CSS.

Website: <http://itboat.com>

Author; Ukraine, Zaporizhia, RubyBots.com — 12/2011 — Present

I contribute huge (as I see it) project: Ruby Bots. When it'll be done it will allow programmers (not system administrators) easily provide Ruby-based projects
